

Comments from Year 5 students visit to Marina Bay Sands precinct

'The boat at the top of Marina Bay Sands inspired me to build a flower on the top of my building. This is for a break at work with a swimming pool and lunch bar.' Shiloh

'I got ideas from the domes in Gardens by the Bay and the Brazil Stadium. I also used a similar design to the Gumdrop Domes but not the same.' Christian

'My ideas for the U shape of my building came from the giant trees because the shapes of the trees were made of lots of triangles. It was important to think about the aesthetics. The U shape also came from a concrete wall that stood out a lot. The curve shape allowed for shelter.' Mackenzie

'When we had a full view of Marina Bay Sands I saw what made it stable, iconic and useful.' Mihika

'The idea of making an entrance to my stadium came from the Marina Bay Sands pick-up and drop-off area, but I made mine for people not cars.' Ava
